KIESEWETTER ORCHID GARDENS  
R.F.D. ROSLYN, L. I., NEW YORK

---

---

RALPH R. KIESEWETTER'S 37 years of experience, as an Orchid Hybridist, go into the making of every seedling produced at Orchid Gardens and through these years he has expended every effort to guard and maintain his policy of **QUALITY PRODUCTION**.

The very best stud plants available are used in each of these crosses and every one is guaranteed to be as represented.

Wasted years of culture and anticipation, which end only in dissapointment, can be avoided by the initial selection of reliable seedlings, which have been developed in the hands of an experienced Hybridist.

You can select a Kieseewetter Seedling with confidence. **EXPERIENCE** and **FIDELITY OF PURPOSE** are **YOUR PROTECTION**.

# C. JOYCE HANNINGTON

## *an outstanding hybrid*

---

We hear talk about experimentation and the care exercised by Orchid Hybridists in making their crosses to develop increasingly better hybrids. 'Once in a lifetime' after years of patient waiting—and wondering—his efforts are rewarded with the magnificent perfection of a flower like **C. Joyce Hannington**. This result is proof of the high standard of quality possible when the hybridist uses the right combination of parents. In many instances such as this one his artificial means of pollination far excels the haphazard chance methods of nature.

**C. Joyce Hannington** has proven to be one of the finest white crosses of all time and is outstanding in shape, texture, and lasting qualities. And further, one of the best things about this cross is the fact that it comes so consistently uniform and wherever shown, it proves its superiority. It has taken more awards in the past two years than any other one cross. Three different plants in our Orchid Garden stock alone have received a **Gold Medal**, **First Class Certificate**, and an **Award of Merit**, respectively.

Since **C. Joyce Hannington** has proved to be such a fine cross we have made it again at Orchid Gardens and seedlings of straight Joyce Hannington which have been in such demand will again be available in tubes in two years time. In the meantime, numerous crosses have been made using one or other of these excellent examples of this cross as one of the parents.

**C. Lady Veitch** and **C. Barbara Dane, var. Perfection** is another white cross of outstanding size and quality, which deserves special mention here. One of these plants blooming for the first time took a **Gold Medal** amidst heavy competition with a large number of plants in a New York Show. Seedlings of this cross are offered in this current catalogue.

**C. Souvenir de Bonito (C. Eucharis x C. Edithae)** is another outstanding white which has been well received and widely acclaimed for its form, texture, and for its free flowering habits.

## SEEDLINGS IN TUBES

The agar-agar formula in which orchid seeds are planted is a jelly-like material which will break up easily when disturbed, therefore, it must be realized that seedlings in tubes will undoubtedly arrive at their destination stirred up. Orders of ten tubes or more can be packed in a specially prepared box and shipped via Railway Express with a reasonable degree of success but regardless of careful packing or method of shipment we cannot guarantee the condition of tubes on arrival. However, this disturbance of the agar does not in any way affect the seedlings and losses will not be suffered if the seedlings are transplanted IMMEDIATELY UPON ARRIVAL. Because of this fact seedlings in tubes are never offered for sale until they are ready for transplanting into community pots.

To avoid excessive losses, prepare your community pots in advance and plan to take care of your seedlings as soon as they arrive.

Remove the contents of the tube to a piece of glass and sprinkle a few drops of water on the seedlings to separate them from the agar. As you separate them, sort the seedlings into groups according to size since they will do better if planted this way. Then using your favorite planting medium, put them into the community pots. Even the very smallest seedlings can be salvaged if they are tossed evenly upon the surface of a five or six inch bulb pan, using the same potting material that you use in the community pots. Leave a half inch space at the top of the pot so that a piece of glass can be placed over the top of the seedlings to maintain the highest possible humidity. Then place the pot in a saucer of water so that the seedlings will be kept very moist. Check them in about a week and you will find that many of them have grown roots and can be planted into their community pot. Replace your glass and leave them for another week and continue in the same way until all of the small seedlings have been planted. By this procedure you will reduce your losses to a minimum; it is an unnecessary loss to throw away the small seedlings as many people do. There will usually be some small seedlings in every tube since some seeds are so much slower to germinate than others.

CUSTOMERS WHO WISH TO GROW THEIR SEEDLINGS ON FOR AWHILE IN THE TUBES SHOULD PLAN TO PICK THEM UP HERE AT THE GREENHOUSE.

## ORDERING

Orders may be placed early to reserve your selections but shipments will be made only when weather conditions permit so that safe delivery to your door can be assured. Orchid plants must be guarded against chilling since they may not recover from the set-back suffered thereby.

If you have a choice, please specify the approximate time that you would like to receive your order, otherwise, we will notify you a few days in advance of shipment so that you can be ready to receive your order. The safe shipping period opens about May fifteenth and continues through October. Plants can be safely shipped by Air Express within the Continental United States any time during the season when there is a mild day to safely transport the package from the greenhouse to the airport, since arrangements have been made with the Airlines to carry these perishable parcels inside the plane at room temperature. If shipment is made to a cold area, plans should be made to pick up the parcel upon arrival so that it does not have to travel around in an unheated delivery truck. Shipment during the coldest part of the winter is discouraged.

When you place your order please mention a second choice if you have one, otherwise we will notify you that we cannot fill your order. NO SUBSTITUTIONS WILL BE MADE WITHOUT SPECIFIC INSTRUCTIONS FROM YOU.

PRINT OR TYPE YOUR NAME AND ADDRESS CLEARLY.

INCLUDE DEFINITE SHIPPING INSTRUCTIONS WITH ALL ORDERS: Please specify whether you wish your package sent by Air Mail; Air Parcel Post; regular mail; Air Express; Air Freight; or Railway Express.

Prompt delivery of your plants is important.

## SHIPMENTS

Selection of the finest and largest plants available in each lot of the crosses included in your order will be made; however, please remember that all crosses do not attain the same size at the same time, therefore do not expect to receive all seedlings of equal size when ordering various crosses. They may or may not be the same and the explanation is simple: all of the tubes are not started at the same time therefore the period of growth varies in each case placing different crosses at an individual stage of development. Furthermore, different parent plants evidence different growing habits which are often reflected in the seedlings produced by these plants. The amount of sun during any one season plays as important part in the growth of plants also so that the seedlings from one cross may even vary somewhat from one year to another. Be assured that you will receive the best from the lot that you have ordered.

ALL SHIPMENTS ARE MADE F. O. B. ROSLYN, L. I., NEW YORK and there is no additional charge made for packing.

## SHIPPING CHARGES

All freight and express packages marked for delivery within the boundaries of Continental United States will be sent COLLECT.

**Prepayment of postage** is required on all packages carried by mail regardless of destination.

Prepayment of charges is also required on **all packages sent outside the boundaries** of continental United States.

To facilitate handling, Orchid Gardens will advance the necessary charges when prepayment is required and a statement will be forwarded to you following shipment. Prompt reimbursement of these charges will be appreciated.

## INSURANCE

All packages will be insured to the full value of their contents except when they are to travel by mail. The U. S. Post Office will not accept parcels containing plants for insurance. Our careful attention will be given to adequate insullation, secure wrapping and labeling but further responsibility after the parcel leaves our hands must be assumed by the customer.

## PAYMENT

All orders are payable in U. S. Dollars; check, cash, or money order should accompany your order, unless previous arrangements have been made to open a credit account. When cash is used for payment please send registered mail for safe delivery.

ALL ITEMS LISTED ARE SUBJECT TO PRIOR SALE.
